

DITI ENGINEERS

Theme Guide

Visual identity, colour system, typography, spacing, and interaction standards for the Diti Engineers website.

DOCUMENT Theme & Design System

VERSION 1.0

DATE June 2026

APPROVED BY Diti Engineers Web Team

SOURCE FILES src/theme/colors.ts · typography.ts · index.css

Brand positioning

One-line positioning

Trusted Rajkot casting manufacturer for OEM buyers — precision-first, factory-backed, no fluff.

Perception pillars

Pillar	Buyers should feel	Avoid
Precision	Engineering-grade quality, repeatability	Generic quality claims without proof
Reliability	13+ years, GST registered, repeat orders	Startup hype, casual tone
Capability	CI + aluminum + die casting under one roof	Single-product shop vibe
Local strength	Rajkot manufacturing hub, fast lead times	Generic template site
Premium craft	Modern site reflects modern factory	Dated brochure aesthetic

Audience

Segment	Profile
Primary	Procurement managers, OEM engineering heads (motors, pumps, automotive)
Secondary	Export buyers, distributors, replacement parts buyers

Voice & tone

Professional · Reliable · Industry-focused · Straightforward

Keywords: casting, manufacturing, precision, motor parts, pump parts, OEM, Rajkot

Visual direction

Design read

B2B manufacturing site for procurement and OEM buyers. Light canvas with deep hero sections, steel-blue accent, editorial layouts, and purposeful scroll motion.

Design dials

Dial	Level	Application
Layout variance	7 / 10	Editorial sections, not rigid 3-column grids
Motion intensity	6 / 10	Scroll reveals, carousels, marquees — no cinematic overload
Visual density	4 / 10	Airy hero, structured product grids, readable facts

Mood

Use	Avoid
Warm off-white canvas (#F8F8F7)	AI purple gradients
Deep steel blue accent (#1B4FD8)	Neon cyberpunk palettes
Graphite dark sections (#0D0D0D)	Pure black #000 backgrounds
Industrial photography	Unrelated stock factory images

Colour system

All colours are defined in `src/theme/colors.ts` and exposed as CSS variables in `src/index.css`. **Do not hardcode hex values in components.**

Primary palette

Token	Hex	Usage
<code>accentPrimary</code>	<code>#1B4FD8</code>	CTAs, active links, stats highlights, focus rings
<code>accentGradientStart</code>	<code>#1B4FD8</code>	Gradient start
<code>accentGradientEnd</code>	<code>#2563EB</code>	Gradient end
<code>accentMuted</code>	<code>#EEF2FF</code>	Badge backgrounds, subtle highlights
<code>accentSteel</code>	<code>#5B6B84</code>	Decorative mid-tones, secondary UI

Backgrounds & surfaces

Token	Hex	Usage
<code>canvas</code>	<code>#F8F8F7</code>	Default page background
<code>canvasDark</code>	<code>#0D0D0D</code>	Dark sections, video areas
<code>canvasDeep</code>	<code>#0B1929</code>	Hero depth, gradient bases
<code>surfaceCardLight</code>	<code>#FFFFFF</code>	Cards on light background
<code>surfaceCardDark</code>	<code>#181818</code>	Cards on dark background
<code>surfaceMuted</code>	<code>#F1F1F0</code>	Muted panels, input backgrounds
<code>surfaceElevated</code>	<code>#FFFFFF</code>	Elevated cards, modals

Text

Token	Hex	Usage
<code>textHeadingLight</code>	<code>#141414</code>	Headlines on light sections
<code>textHeadingDark</code>	<code>#F5F5F5</code>	Headlines on dark sections
<code>textPrimaryLight</code>	<code>#3D4B5C</code>	Body copy on light sections
<code>textPrimaryDark</code>	<code>#D1D5DB</code>	Body copy on dark sections
<code>textMuted</code>	<code>#7A8696</code>	Captions, labels, eyebrows
<code>textOnDark</code>	<code>#FFFFFF</code>	Text on dark buttons / overlays
<code>textOnLight</code>	<code>#141414</code>	Text on light buttons

Borders

Token	Value	Usage
<code>borderLight</code>	<code>#E2E4E8</code>	Dividers, card borders
<code>borderDark</code>	<code>rgba(255,255,255,0.08)</code>	Dividers on dark sections
<code>borderGlass</code>	<code>rgba(255,255,255,0.18)</code>	Glass panels, overlays

Typography

Defined in `src/theme/typography.ts`. Loaded via Google Fonts in the site.

Font families

Role	Font	Character
Display	Outfit	Geometric, industrial, precise — headlines
Body	DM Sans	Clean, legible — paragraphs and UI
Mono	IBM Plex Mono	Engineering labels, badges, stats

Type scale

Token	Size	Typical use
<code>heroDisplay</code>	6.125rem (98px)	Large hero display
<code>h1</code>	3.5rem (56px)	Page headlines
<code>h2</code>	2.25rem (36px)	Section titles
<code>sectionTitle</code>	1.92rem (~31px)	Section headers
<code>h3</code>	1.25rem (20px)	Card titles
<code>bodyLg</code>	1.0625rem (17px)	Lead paragraphs
<code>body</code>	1rem (16px)	Standard body
<code>eyebrow</code>	0.6875rem (11px)	Section labels, uppercase
<code>caption</code>	0.75rem (12px)	Meta text, footnotes

Weights & tracking

Weight	Value	Use
Regular	400	Body text
Medium	500	Eyebrows, labels
Semibold	600	Subheadings, buttons
Bold	700	Headlines, stats
Extrabold	800	Display emphasis

Eyebrow tracking: `0.1em` uppercase. Display tracking: `-0.02em` to `-0.03em`.

Spacing & layout

Spacing tokens

Token	Value	Use
xs	8px	Tight gaps
sm	12px	Icon gaps
md	16px	Default inner padding
lg	20px	Card padding
xl	24px	Section inner gaps
xxl	40px	Block separation
xxxl	48px	Large section gaps
xxxxl	64px	Hero padding
nav	4rem	Nav offset (mobile)
navLg	4.25rem	Nav offset (desktop)

Border radius

Token	Value	Use
xs	3px	Badges
sm	5px	Small chips
md	8px	Inputs
base	10px	Cards (default)
lg	14px	Large cards
xl	18px	Modals, panels
full	9999px	Pills, avatars

Elevation (shadows)

Token	Use
default	Subtle resting state
active	Pressed / focused elements
card	Standard card shadow
cardHover	Card hover lift with blue tint

Layout conventions

Pattern	Specification
Max content width	<code>max-w-7xl (.container-main)</code>
Section padding	<code>py-12 md:py-16 lg:py-20</code>
Nav behaviour	Fixed top · blur backdrop · shadow on scroll
Grid	Responsive 1 → 2 → 3/4 columns

Components

Navigation

Fixed header with logo left, mega menus centre, language toggle and Contact CTA right. Active route uses accent colour.

Buttons

Variant	Appearance
Primary	Steel blue fill, white text
Outline	Border + transparent, accent on hover
Ghost	Text only, accent on hover

Minimum tap target: 44px on mobile.

Cards

White surface on light canvas · 10px radius · card shadow · hover lift with `cardHover` shadow. Product and service cards include image, title, description, and optional tags.

Forms

Inputs: muted surface background, light border, accent focus ring. Contact uses quick form + multi-step quote sheet (slide-over).

Glass panel

Used on capabilities carousel — frosted overlay with border-glass, readable over video backgrounds.

Tags & badges

Eyebrow style: uppercase, wide tracking, muted or accent-muted background.

Motion & interaction

Stack: Framer Motion (`src/lib/motion.ts` , `src/components/motion/`)

Pattern	Where	Spec
Stagger fade-up	Hero, section headers	~0.2s stagger, 0.5s duration
Scroll reveal	Section entry	Fade + translate, viewport once
Carousel	Services, machinery, capabilities	Swipe + controls
Marquee	Trust strip, buyers	Linear infinite scroll
Nav transition	Header	Backdrop blur + shadow after 80px scroll
Form steps	Quote sheet	Slide transition between steps

Timing tokens

Token	Value
<code>--duration-fast</code>	160ms
<code>--duration-normal</code>	250ms
<code>--duration-slow</code>	400ms
<code>--ease-out</code>	cubic-bezier(0.23, 1, 0.32, 1)

Accessibility: All motion respects `prefers-reduced-motion`.

Imagery & content rules

Asset type	Direction
Hero	Real factory floor, casting lines, QC — not generic stock
Products	One photo per product line, consistent lighting
Machinery	Equipment nameplate visible where possible
Certificates	Scanned credentials, inspection stations
Video	Factory walkthrough, muted autoplay on web

i18n rule: All user-facing strings live in `src/i18n/en.json` and `src/i18n/fr.json` — not inline in components.

Do & don't

Do	Don't
Use theme tokens for colour and type	Hardcode hex or font sizes in components
Show GST, IndiaMART tenure, Rajkot location	Claim unverified ISO or certifications
Keep copy professional and specific	Use casual or hype language
Use real factory photography	Use unrelated stock images
Maintain 24-hour quote response promise	Over-promise lead times without qualification
Support EN and FR equally	Leave French strings missing
